IF YOU SMELL NATURAL GAS

Natural gas has no odor of its own. That's why Atmos Energy adds a distinctive odor so that you can detect even small amounts of leaking natural gas.

1

If you smell gas, leave the building immediately and tell others to leave, too.

2

Do not smoke, strike a match, switch anything on or off, or start or stop a vehicle or mechanical equipment.

3

Do not use the telephone. Call Atmos Energy or 911 as quickly as possible from a neighbor's phone.
