

March 13, 2015

Ms. Kari French  
Director, Oversight and Safety Division  
Railroad Commission of Texas

Ms. French:

Please find attached for your review and approval the Atmos Energy Mid-Tex Division's Distribution Facilities Replacement Completion Report and Distribution Facilities Replacement Work Plan pursuant to the requirements of Railroad Commission of Texas 16 TAC 8.209 Distribution Facilities Replacement rule.

During the calendar year ending December 31, 2014, the Atmos Energy Mid-Tex Division replaced facilities based on an assessment of existing, known risk and in response to changing conditions that created risk as they presented themselves during the year (i.e. occurrence of leaks, newly identified threats). In total, the Mid-Tex Division replaced approximately 703,000 feet of steel main, 312,000 feet of cast iron main, 127,000 feet of plastic main, and 18,000 service lines. The Distribution Facilities Replacement Completion Report detailing the distribution facilities replaced by the Mid-Tex Division during the calendar year ending December 31, 2014 is included as an enclosure to this correspondence.

During the calendar year ending December 31, 2015, the Atmos Energy Mid-Tex Division will continue to replace facilities based on an assessment of existing, known risk and in response to changing conditions that create risk as they present themselves during the year. In total, the Mid-Tex Division plans to replace approximately 422,000 feet of steel main, 370,000 feet of cast iron main, 153,000 feet of plastic main, and 15,000 service lines. The Distribution Facilities Replacement Work Plan outlining the facilities proposed for replacement by the Mid-Tex Division during the calendar year ending December 31, 2015 is included as an enclosure to this correspondence.

Atmos Energy recognizes that risk characterized in the Work Plan is defined by 'known' conditions that exist within facilities in the distribution system at the time the risk assessment is performed and the Work Plan is established. A risk model cannot quantify unknown, undiscovered or unranked risk. Atmos Energy will take into account these 'unknown' conditions in any given year as they present themselves and may retire or replace facilities in order to mitigate these risks.

We appreciate the opportunity to update the Railroad Commission on work completed in 2014 and your consideration of our replacement plans for 2015. We look forward to your response.

Sincerely,

A handwritten signature in black ink that reads "Andy Treadway".

Andy Treadway  
Director, Compliance, Mid-Tex
