

We're investing in a safe, reliable natural gas system. **From the ground up.**

Project Details

Where is work being done?

Area bordered by Railroad Ave., E. Ohea St., and Martin Luther King Jr. Blvd. (see project map for more detail)

Dates:

Work in Greenville begins in October 2018 and is expected to be complete in March 2019.

How will this impact me?

Before work begins in your neighborhood, we will place a door tag at your home. Once construction is started, it could cause a temporary disruption to your natural gas service. If this happens, we will talk to you or leave a door tag with next steps to restore service.

Why are you replacing pipelines?

We are upgrading aging infrastructure with newer pipe to increase the safety and reliability of our system. The new gas lines require less maintenance and meet all current safety requirements.

Investing in Safety for You

Atmos Energy is committed to being the safest natural gas provider in the nation and in Mississippi. That's why we're investing between \$80 to \$90 million in system upgrades.

In 2018-2019, our efforts in Greenville will focus on upgrading several thousand feet of natural gas pipelines located in city streets, including the gas line that connects to your meter.

Natural Gas Pipeline Upgrades

When upgrading our natural gas lines, you'll see us working in streets and yards. This may include cutting holes in streets and driveways, plus digging in some yards. While work is going on, we will make temporary repairs to yards and sidewalks. When the work is complete, we will make arrangements with you to restore affected areas to their previous conditions.

We will work closely with the City of Greenville to limit the impact to you and other residents. We appreciate your patience as we work to finish the project safely and as quickly as possible.
