

RAILROAD COMMISSION OF TEXAS PIPELINE SAFETY DIVISION

February 20, 2014

MR. JEFFREY S. KNIGHTS
VP, TECHNICAL SERVICES
ATMOS ENERGY CORP., MID-TEX DIVISION
DALLAS, TX 75222-3705

RE: Distribution Facilities Replacements Annual
Notification

Dear Mr. Knights:

The Pipeline Safety Division has received your letter and annual filing in which you provide your proposed revisions and removal/replacement work plan for calendar year 2013. Railroad Commission Rule 16 Tex. Admin. Code §8.209(i)(2) requires this information annually as part of the implementation of your risk-based distribution facilities replacement program. The Pipeline Safety Division accepts this notification and has no objection to the implementation of this plan as provided.

Specific information regarding any proposed changes or planned work for the removal or replacement of pipe will be reviewed by the Pipeline Safety Division in a future safety evaluation. We appreciate your compliance with this requirement and look forward to working with you on this more comprehensive review. We will notify you if additional information is required.

If you have any questions, please do not hesitate to contact me at (512) 463-7058.

Sincerely,

A handwritten signature in cursive script that reads "Diane Watson".

Diane Watson
