

## RAILROAD COMMISSION OF TEXAS PIPELINE SAFETY DIVISION

March 26, 2014

MR. JEFFREY S. KNIGHTS  
V.P. TECHNICAL SERVICES  
ATMOS ENERGY, MID-TEX DIVISON  
P.O. BOX 223705  
DALLAS, TX 75222-3705

RE: Distribution Facilities Replacements Annual  
Notification

Dear Mr. Knights:

The Pipeline Safety Division has received your letter and annual filing in which you provide your proposed revisions and removal/replacement work plan for calendar year 2014. Railroad Commission Rule 16 Tex. Admin. Code §8.209(i)(2) requires this information annually as part of the implementation of your risk-based distribution facilities replacement program. The Pipeline Safety Division accepts this notification and has no objection to the implementation of this plan as provided.

Specific information regarding any proposed changes or planned work for the removal or replacement of pipe will be reviewed by the Pipeline Safety Division in a future safety evaluation. We appreciate your compliance with this requirement and look forward to working with you on this more comprehensive review. We will notify you if additional information is required.

If you have any questions, please do not hesitate to contact me at (512) 463-1971.

Sincerely,

Diane Watson  
Railroad Commission of Texas  
Pipeline Safety Division
